PharmaCare Employees Give To Local Salvation Army

CUMBERLAND, MD (April 13, 2017) –The employees of the PharmaCare Network decided to give to others this Easter holiday. The 40 Items for 40 Days of Lent, was an employee driven donation drive held through the company’s corporate office at 3 Commerce Drive in Cumberland, Maryland. The employees of all the PharmaCare and Medicine Shoppe locations cleaned out their closets and made donations to help the Salvation Army change lives in their local community.

“Our employees wanted to make difference over the Easter holiday by giving up and giving back.” said The PharmaCare Network’s Director of Human Resources, Jodi Chamberlain. “We have had donations of not only clothing, but canned and dry foods, toiletry items and cleaning supplies.”

The Salvation Army located at 701 E. First Street in Cumberland, Maryland has been serving people in the community since 1889. They provide not only disaster relief and Sunday church services, but a food pantry, clothing, household items for people that have faced the devastation of a fire or flood, men’s and women’s programs along with an afterschool program for children where they can get help with homework, a meal and some fun time in the gym area before going home. “Our location serves an average of 350-400 families and the donations from the PharmaCare employees are such a blessing. It helps us give dignity back to people – to show them that someone loves and cares for them.” said Major Diane Blevins of the Salvation Army. “The donations received will help us provide basic necessities, blankets and food for the homeless as well as put together personal care packets to send along with children for this year’s Summer Camp in Martinsburg, WV.”

The 40 Items for 40 Days of Lent will end this week with all remaining donations being presented to the local Salvation Army locations. “Our employees used the 40 Days of Lent for their donation drive, but donations can be made to the Salvation Army any time and would be greatly appreciated.” stated The PharmaCare Network’s Director of Marketing & Public Relations, Jennifer Hare.

Serving the tri-state area, The PharmaCare Network includes seven retail pharmacies, a home medical equipment location with respiratory services, an institutional pharmacy, and an infusion pharmacy.
